DAEMON

Alluminium MATTE

DAEMON

Line of DAEMON LED rearview mirrors for Ducati and BMW designed by DB Race Design. The mirrors are made entirely from billet aluminum through a CNC machining process and feature the central insert that houses the SMD-type LED turn signals with SEQUENTIAL fuction . The mirrors are short arm and perfectly interchangeable with the originals.

The rear view mirrors in the DAEMON line are. supplied in pairs (R + L) In an elegant package. The rearview mirror comes already complete with fairing attachment (choose the bike model at the time of 'purchase) and electrical connection, also does NOT need any resistance for proper operation (it is already mounted on board) as it is perfectly compatible with the original electrical system

Carbon MATTE

Carbon SHINY

Carbon RED

SILVER forget carbon

CARATTERISTICHE

NEW DESIGN

ALUMINIUM 01

All details have been obtained from solid aluminium block, the finish and the color are created with a chemical process called anodizing.

CARBON 02

The upper insert is 100% carbon

DESIGN 03

Unique design for a unique brand. The mirrors have a short arm and they are perfectly interchangeable with the Ducati or BMW original ones.

CLOSEABLE 04

The mirrors can be closed in the inside without the use of any tool.

05 JOINT

The mirrors are supplied with a specific joint for your bike. They are available for all Ducati Panigale, Streetfighter and BMW S1000RR bikes.

06 ELECTRICAL CONNECTION

The mirrors are supplied in pairs of two with the original connector of the Ducati or BMW bikes. They do not need any resistance and/or change to the original implant.

07 SEQUENTIAL LED

The mirrors are equipped with LED turn signal such as SMD with SEQUENTIAL ignition.
